/ ALL ABOUT ME

I am a self-taught web developer with over 3 years of experience and with a strong eye for innovative design and a keen understanding of techniques geared toward optimum user experience.

/ WORK EXPERIENCE

>> Web Development Intern

Corevalue Technologies April 2018 - January 2019

>> Web Development Engineer

Corevalue Technologies | January 2019 to March 2021

>> Senior Web Development Engineer

Corevalue Technologies | March 2021 to Current

Here at CVT (www.corevaluetech.com), I worked on various products like Successdata which is a Document Processing solution that redefines how you can access data in your most complex unstructured documents and BirdsEyeView which is a system for the Parametric insurance, which will provide direct online method for farmers to get their crops insured against excess rain or draught conditions with the ability to get automatic payouts.

/ PROJECTS

>> Successdata

January 2019 - Current (<https://www.successdata.ai/>)

SuccessData is an Intelligent Document Processing solution that redefines how you can access data in your most complex unstructured documents.

I am working as a single web developer and build an application single handedly without any help. I also developed the UX for the application.

Technology Used: HTML, CSS, Javascript, Vuejs, Bootstrap, Keycloak, Pdf.js, Chartjs, ag-grid, fabricjs, Apexcharts, SockJS (Websocket) etc.

>> BirdsEyeView

January 2021 - Current (<https://www.birdseyeviewtechnologies.com/>)

Designing and developing the system for the Parametric insurance, which will provide direct online method for farmers to get their crops insured against excess rain or draught conditions with the ability to get automatic payouts. This system will be capable of producing live quotes using data models developed for the specific use case.

I am working as a single web developer and build an application with multiple features. I have to create an application from given UX designs in very less time.

Technology Used: HTML, CSS, Javascript, Vuejs, Keycloak, LeafletJS (Map library), Chartjs, Swagger

>> Xift

March 2020 - April 2020 (<https://xift.com/>)

Xift is a enterprise level email/document security & archiving product. which gives power in the hand of business owners to manage there content, emails as per there terms and business rules.

I worked on Preference Service in which I have to integrate a complex response structure in the UI.

Technology Used: HTML, CSS, Javascript, Vuejs, Vuetify, PDFTron,

>> Shepherd

August 2018 - September 2018 (<https://shprd.com/>)

Worked on Shepherd website.

Technology Used: HTML, CSS, Javascript, JQuery

Along with the above projects I also worked on some different things like Creating LinkedIn Posts for the company, worked on some projects initially like Deviance (a web scrapping project) UI.

/ EDUCATION HISTORY

>> Diploma in Multimedia Graphic and Web Designing

>> Bachelor of Commerce

> School Of Open Learning - 2017 - 2020
